USER MANUAL

G500 SERIES

CONTENT

FCC COMPLIANCE STATEMENT
FOR AMERICAN USERS

This equipment has been tested and found to comply with the limits for a CLASS A digital device, pursuant to Part 15 Subpart B of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at own expense.

EMS AND EMI COMPLIANCE STATEMENT
FOR EUROPEAN USERS

This equipment has been tested and passed with the requirements relating to electromagnetic compatibility based on the standards EN 55032:2006/A1:2013 Class A, EN61000-3-2:2006, EN55032:2012/AC:2013 Class A, EN61000-3-2:2014 , IEC 61000-4-2:2008 series, The equipment also tested and passed in accordance with the European Standard EN55022 for the both Radiated and Conducted emissions limits.

G500 SERIES
TO WHICH THIS DECLARATION RELATES
IS IN CONFORMITY WITH THE FOLLOWING STANDARDS

IEC 62368-1:2014,IEC 60950-1:2005(2nd Edition)+Am 1:2009 Am 2:2013, GB9254-2008 (Class A) ; GB17625. 1-2012; GB4943.1-2011, EN55032:2012/AC:2013 Class A, EN61000-3-2:2014, EN 61000-3-3:2013 and EN55024:2010, IEC 61000-4-2:2008 series, UL 60950-1, 1st Edition, 2007-10-31, CSA C22.2 No. 60950-1-03, 1st Edition, 2006-07, CFR 47, Part 15 Subpart B

WARNING

This is a Class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

此为 Class A 产品，在生活环境中，该产品可能造成无线电干扰，在这种情况下，可能需要用户对其干扰采取切实可行的措施。

此爲Class A產品，在生活環境中，該產品可能造成無線電干擾，在這種情況下，可能需要用戶對其乾擾採取切實可行的措施。

SAFETY INSTRUCTIONS

Please read the following instructions carefully.
1. Keep the equipment away from humidity.
2. Before you connect the equipment to the power outlet, please check the voltage of the power source.
3. Make sure the printer is off before plugging the power connector into the power jack.
4. It is recommended that you connect the printer to a surge protector to prevent possible transient overvoltage damage.
5. Be careful not to get liquid on the equipment to avoid electrical shock.
6. For safety and warranty reasons, ONLY qualified service personnel should open the equipment.
7. Do not repair or adjust energized equipment under any circumstances.

CAUTION

* Danger of explosion if battery is incorrectly replaced. Replace only with the equivalent type recommended by the manufacturer.
* Dispose of used batteries according to the manufacturer's instructions.
* Only use with designated power supply adapter model.
* Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
1 Barcode Printer

1.1 Box Content

Please check that all of the following items are included with your printer.

- Barcode Printer

- Power Cord

- AC Adapter

- USB Cable

- Ribbon

- Label Stock
- Ribbon Hubs (set of 2)

- Empty Ribbon Core

- Label Supply Hub

- Label Guide Plates (set of 2)

- Quick Reference Guide

2 Printer Setup

2.1 Open The Printer Cover

▸ **Pressing The Cover Open Buttons**

Place the printer on a flat surface. Open the printer cover by pressing the release buttons on both sides of the printer housing and lift the cover.

Pressing the button

Pressing the button

COVER OPEN BUTTONS

Release buttons for opening the printer cover.

Lift the printer cover backward
2.2 Open The Printing Mechanism

▸ **Pressing The Release Catches**

Release and lift the printing mechanism.

RELEASE CATCHES

Lift the printing mechanism

Pressing

Pressing
2.3 Loading The Ribbon

▸ **A New Ribbon Module Installation**

Place the new ribbon on the hub which forms a ribbon supply hub.

RIBBON SUPPLY HUB

Place on the hub

RIBBON HUB   NEW RIBBON
Place the empty ribbon core on the hub which forms a ribbon rewind hub.

RIBBON FEED MODULE

Place on the hub

RIBBON HUB   EMPTY RIBBON CORE
Stick the ribbon supply hub on the ribbon rewind hub and wind the rewind hub 2~3 circles.

Wind the ribbon around the core
▶ Install The Ribbon On The Printer

Place the ribbon supply hub at the back of the printing mechanism.

Insert into the printing mechanism
Pass the ribbon supply hub under the print head.

Insert the ribbon rewind hub on the ribbon feed mechanism.

Close the printing mechanism, making sure that it clicks into place.

Place on the printing mechanism

Wind to the back

RIBBON FEED MECHANISM
2.4 Loading The Label Roll

▶ **A New Label Roll Module Installation**
  Place the label stock on the label supply hub, attach the guide plates to the label stock holder.

LABEL STOCK

Place on the ribbon hub

LABEL SUPPLY HUB
LABEL GUIDE PLATES

▶ **Install The Label Roll Module On The Printer**
  Now load the label stock into the printer.

Place on the printer
Release the printing mechanism and lift it.
Pass the labels through the label guides up to the tear-off plate.
Adjust the label guides to the label width.

Through the label guides

LABEL GUIDES
Close the printing mechanism.

2.5 Installing The Label Supply Hub

▸ **1" Cores**
 Installing the label supply hub for 1" cores.
▸ **1.5" Cores**
 Installing the label supply hub for 1.5" cores.
▸ **3" Cores**
 Installing the label supply hub for 3" cores.
2.6 Preparing For Tag Printing

In tag printing, the tag hole indicates the height of a label. During adjustment, the sensor must therefore be positioned directly below the tag hole as shown in the illustration. The tag hole should be at least 3 mm in diameter to ensure correct functioning.

SENSOR POSITION
2.7 Connecting The Printer To The Host Computer

- Please make sure that the printer is switched off.
- Connect the power cord to the AC adapter and connect the adapter to the printer.
- Connect the USB / parallel cable to the printer and host computer.
- Switch on the printer. The LED indicator should now lights up.

2.8 Installing The Driver

STEP-01 ▸ Insert the product CD in the CD/DVD drive of the host computer and open the "Seagull-Driver" folder on the CD.

STEP-02 ▸ Select the icon for the driver file and click it to start the installation.
STEP-03 ▸ Follow the instructions on the screen. The Driver Wizard guides you through the installation procedure.

STEP-04 ▸ Select "Install printer drivers".

STEP-05 ▸ Specify your printer model.
STEP-06 ▸ Specify the port used to connect the printer to the host computer.
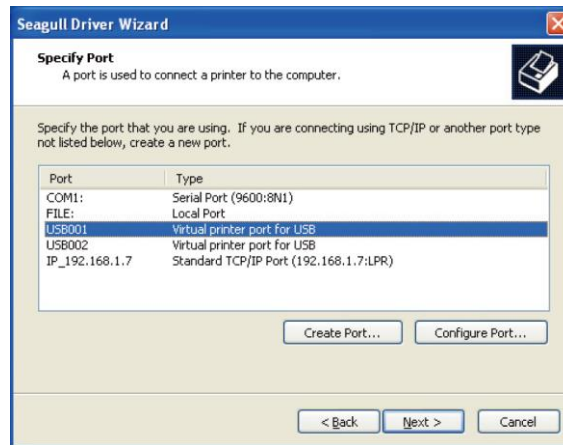

STEP-07 ▸ Enter a printer name and assign the appropriate rights.
STEP-08 ▸ Once the installation is complete, a summary of the printer settings is displayed.

STEP-09 ▸ Check whether the printer settings are correct and click "Finish" to start copying the driver files.

STEP-10 ▸ Wait until copying is complete, then finish the installation.

STEP-11 ‣ Once the driver installation is complete, the new printer should appear in the "Printers and Faxes" folder.
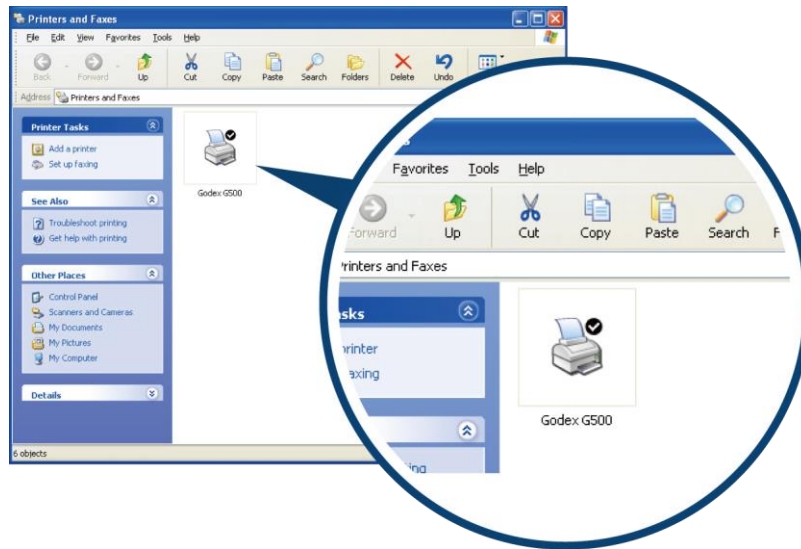

3 Operation Panel

3.1 LED Operation Panel

When you press the FEED button, the printer moves the label to the defined stop position. If you are using continuous labels, pressing the FEED button will move label stock until you release the button again. If you are using individual labels, pressing the FEED button will move only one label. If the label does not stop at the correct position, please run the auto calibration (See Section 3-2. for the label size calibration function) on the label stock.

▶ LED Indicators

	LED indicator		Beeps	Status	Description
READY ● STATUS ● FEED	READY	Green	X	**Standby mode**	The printer is ready for operation.
	STATUS	X			
	READY	X	2 x 2 beeps 2 x 3 beeps 2 x 4 beeps	**Error mode**	The printer has detected an error. (See Section 3-3. for Error alerts)
	STATUS	Red			

3.2 Label size calibration and Self Test Page

The printer can automatically detect and store label height.

That means the host computer does not need to transmit the label height to the printer.

And the self-test function lets you check whether the printer is functioning normally.

Here is how you run the label size calibration and self test.

STEP-01 ▸ Check that the label stock is loaded correctly.

STEP-02 ▸ Switch off the printer.

STEP-03 ▸ Switch the printer on again, keeping the FEED button pressed. When the READY LED starts to flash red and the STATUS LED lights up orange, release the FEED button. The printer will now measure the label stock and store the label height.
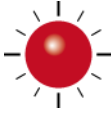

STEP-04 ▸ Once the printer has successfully measured the label stock, it will print a self-test label.
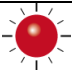

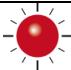

The contents of a self-test printout are listed below.

Model & Version	G500 GX.XXX
USB ID setting	USB S/N: XXXXXXXX
Serial port setting	Serial port : 96,N,8,1

3.3 Error Alerts

In the event of a problem that prevents normal functioning of the printer, you will see an error message on LED indicators and hear some beep signals. Please refer to below table for the error alerts.

· Light on

· Flashing

LED indicator		Beeps	Description	Solution
READY	STATUS			
	⬤	2 x 4 beeps	The printing mechanism is not correctly closed.	Open the print mechanism and close it again.
⬤	⬤	None	High temperature at the p rint head.	Once the print head has cooled down, the printer switches to standby mode.
	⬤	2 x 3 beeps	No ribbon is installed and the printer displa ys an error.	Make sure that the printer is set to direct thermal printing mode.
			The ribbon is finished or the label supply hub is not moving.	Replace the ribbon roll.
	⬤	2 x 2 beeps	No paper is detected.	Make sure that the label sensor is positioned correctly. If the sensor still does not detect the paper, run the auto-detection function again.
			Paper is finished.	Replace the label roll.
			Printer feed problem.	Possible reasons: the print medium has become trapped around the rubber roll; the sensor cannot detect a gap or black mark between the labels; there is no paper. Please reset the sensor.
	⬤	2 x 2 beeps	The memory is full. The printer prints the message "File System full".	Delete unnecessary data or install additional memory.
			Unable to find file. The printer prints the message "File Name Not found".	Use the "~X4" command to print all files. Then check whether the files exist and whether the names are correct.
			A file of the same name already exists. The printer prints the message "Duplicate Name".	Change the name of the file and try storing it again.

4 NetSetting for Ethernet

4.1 Installing The NetSetting software

The NetSetting software is used to manage the network configurations when connecting the printer via Ethernet port.

It is available on product CD or can be downloaded from official website. To install the NetSetting, please follow below steps.

STEP-01 ▸ Insert the product CD in the CD/DVD drive of the host computer and open the "Ethernet" folder on the CD.

STEP-02 ▸ Select the icon for the NetSetting installation file and click it to start the installation.
STEP-03 ▸ Follow the instructions on the screen. The Setup Wizard guides you through the installation procedure.

STEP-04 ▸ Specify the "Installation Folder".
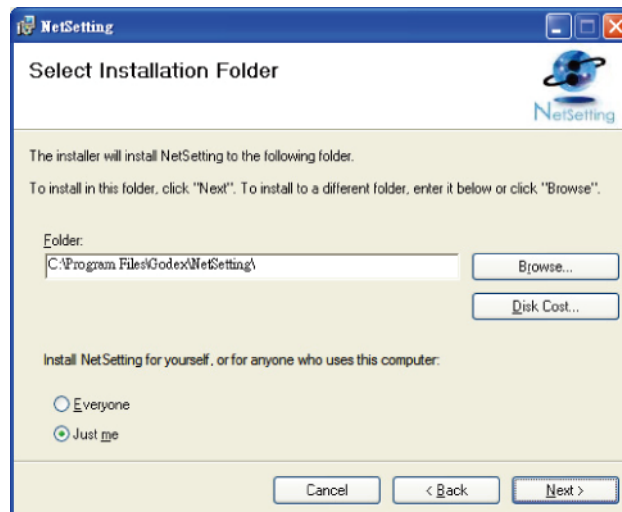

STEP-05 ▸ Click "Next" to start the installation.

STEP-06 ▸ Once the installation is completed; you will see the NetSetting icon on your desktop.
4.2 The interface of NetSetting

Click the NetSetting icon to start the program; you will see the start page as below. The start page will display the basic information of connected printer and your PC.
Click the magnifier icon to search the Godex printers which are connected via Ethernet port in you network environment. Once a connected Godex printer is detected, it will be listed on the start page.
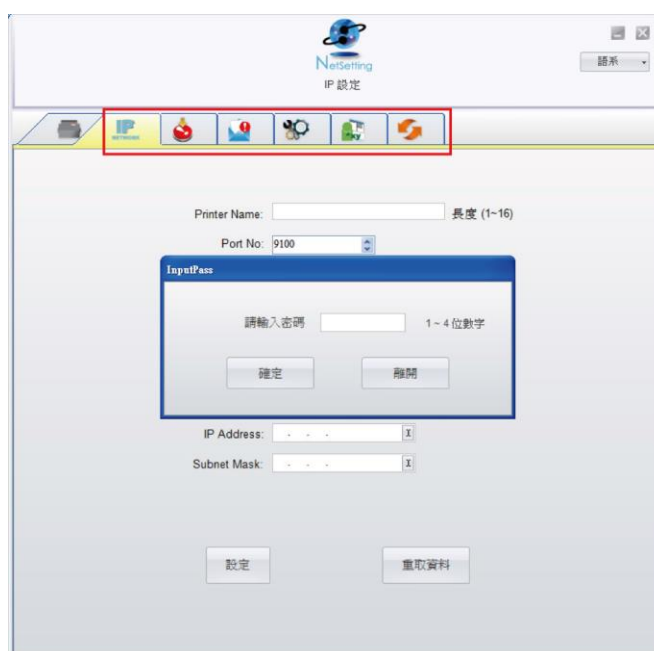

There are six tabs on the top of interface which can configure different types of network settings. But for the data security reason, you need correct password to enter the configuration pages.

Notice • The default password is "1111", you can change the password later from the "IP Setting" tab.

IP Setting

The IP Setting tab can change the printer name, Port number, Gateway setting and the password for configuring the printer. You can also set the printer's IP address ether by DHCP or by Static IP.

You can press "Set" button to apply the settings and "ReGet" button to refresh the setting values.

Notice   · To fully benefit from the NetSetting software, you should be familiar with basic networking principles. Please contact your network administrator for related network setting information.

Alert Path Setting

NetSetting will send the alert messages to designated mail account when the error happened on printer. The alert messages are sent by SMTP (Simple Mail Transfer Protocol) or SNMP (Simple Network Management Protocol).

You can set or change the configurations of SMTP and SNMP on this "Alert Path Setting" tab.

You can press "Set" button to apply the settings and "ReGet" button to refresh the setting values.

Alert Message Setting

For the alert message notification function, you can decide which error cases need to be sent out to the operator.

Moreover, the alert messages can be set to be sent by SMTP, SNMP or both.
You can press "Set" button to apply the settings and "ReGet" button to refresh the setting values.

Printer Configuration

Set or change the configurations of connected printer. Most of key settings for the printer operation can be done by this setting page.

You can press "Set" button to apply the settings and "ReGet" button to refresh the setting values.

User Command

The "User Command" tab provides a communication interface for operator to control the printer. Input printer commands in "Input Command" window and press "Send Command" button, the commands will be sent to the printer.

For some commands that will return response message, the message will be displayed in "Output Message" window.
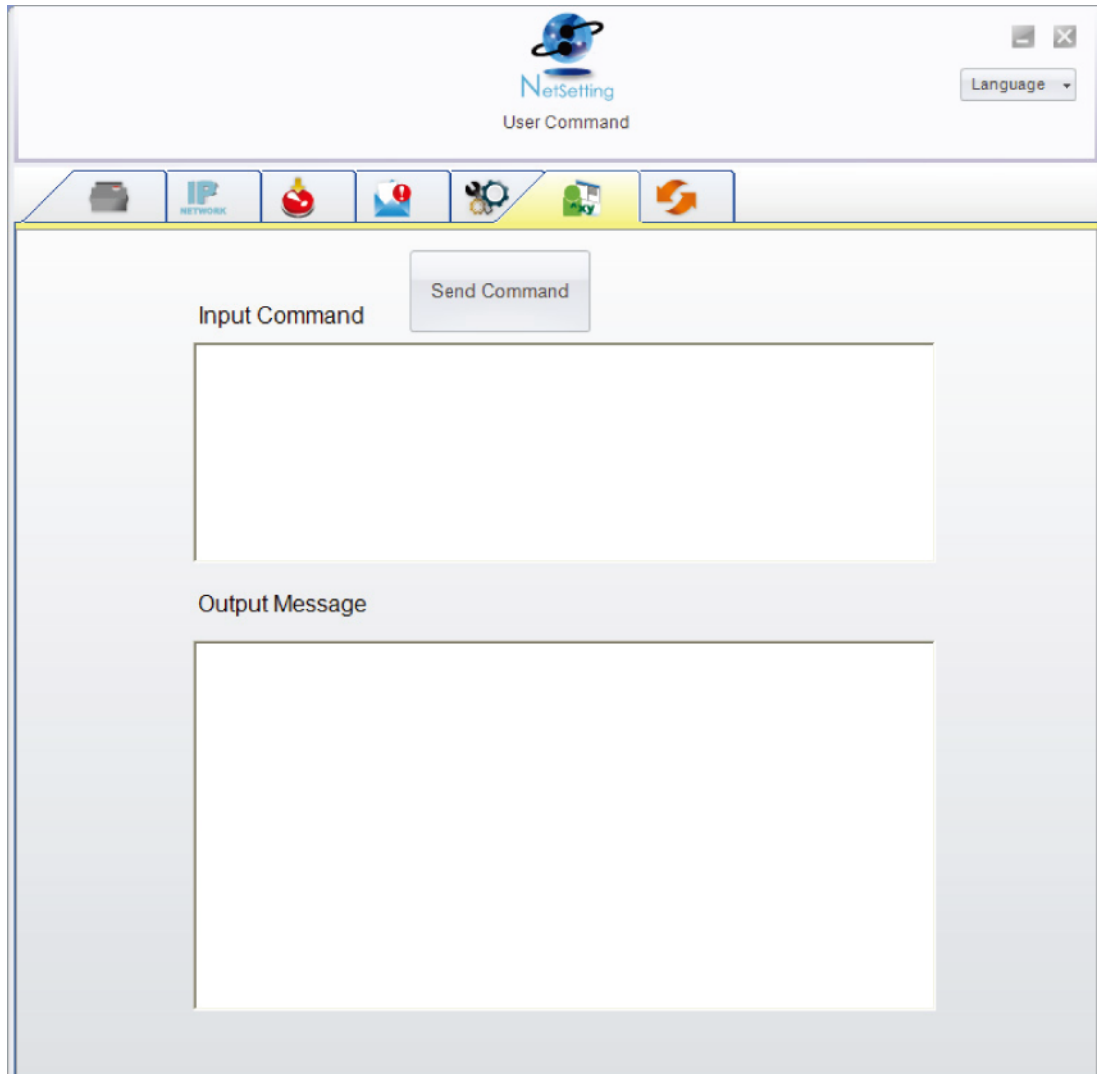

You can press "Send Command" button to send printer commands via Ethernet port and control the printer remotely.

Firmware Download

On "Firmware Download" tab, the current version of printer firmware will be showed on the screen. If you need to update the printer firmware, just specify the file location of firmware file and press "Start Download Firmware" button.
The printer firmware then can be updated remotely.
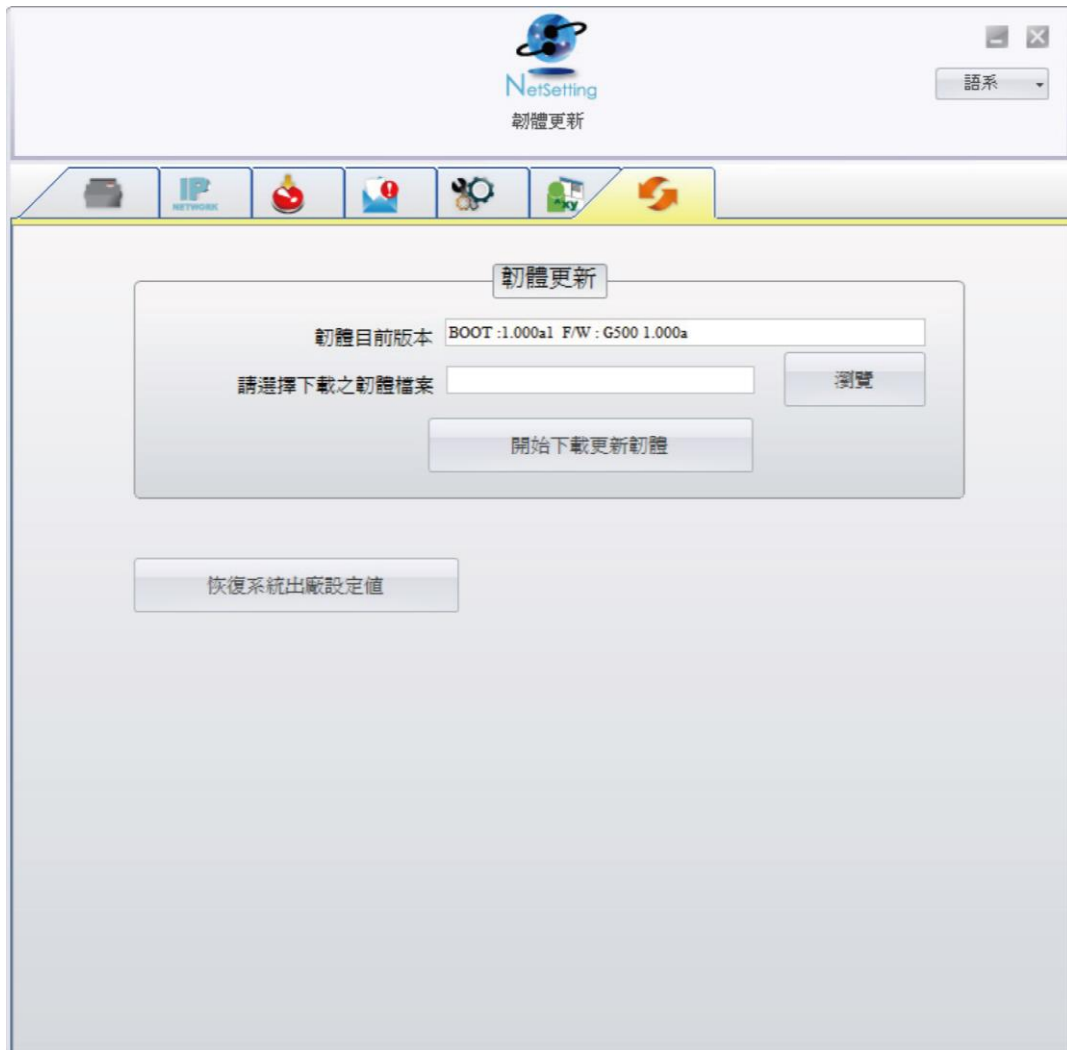

In addition to the firmware update, you can press "Recover To Factory Settings" button to restore the printer configurations back to factory default.

5 Accessories

▸ **Preparation Steps**

Before installing the optional modules, please make some preparations as follows.

STEP-01 Turn Off The Printer :

Remember to switch off the printer before installing any module.

STEP-02 Open The Printer Cover :

Open the printer cover by pressing the release buttons on both sides of the printer housing.

Please see the Section 2-1 for further information about Open The Printer Cover.

STEP-03 Open The Printing Mechanism :

Press the release catches on both sides of the printing mechanism to open and lift the printing mechanism.

Please see the Section 2-2 for further information about Open The Printing Mechanism.

STEP-04 Remove The Front Cover :

To remove the front cover, press in the two plastic release tabs.

Remove the front cover as shown in the illustration.

FRONT COVER

Pressing the two plastic release tabs

Release the front cover
5.1 Installing The Label Dispenser

▶ **The Overview Of The Label Dispenser**

CONNECT CABLE OF LABEL DISPENSER

PAPER SENSOR

PAPER FEED ROLLER

LABEL DISPENSER MODULE

SCREWS
Notice
- A label liner thickness of 0.006 mm ± 10% and a weight of 65 g/m2 ± 6% are recommended.
- The label dispenser will take labels up to a max. width of 110 mm.
- When using the label dispenser, set the stop position to 9 mm.

▶ **Preparation Steps**
Please complete the preparation steps before installing the label dispenser.

▶ Installing The Label Dispenser

Connect the dispenser cable to the lower jack as shown in the illustration on the right.

LOWER JACK

CONNECT CABLE OF
LABEL DISPENSER
MODULE
Notice
- The printer must be switched off, or the motherboard may be damaged!
- There are 2 jacks : the lower jack is for the dispenser, the upper jack for the cutter.

Install the dispenser by pressing down first its right-hand side and then its left-hand side.

RIGHT-HAND SIDE

LEFT-HAND SIDE

LABEL DISPENSER MODULE
Secure the dispenser using the screws provided for this purpose.

THE PAPER FEED ROLLER OF PRINTER
Close the label dispenser and the print mechanism. The installation is completed now.

Close
Press the FEED button to feed the label. The label will be peeled from the liner while it passes through the label dispenser.

Notice • There is a paper sensor on the Label Dispenser module. It will stop the printing if it is covered by label. Remove the last printed label and the printer will then continue to print next label.

Remove the label

Press the FEED key

LABEL   LINER
5.2 Installing The Cutter

▶ **The Overview Of The Cutter**

CONNECT CABLE OF CUTTER

CUTTER MODULE

SCREWS
Notice • Remember to switch off the printer before installing the cutter.

• Do not use to cut adhesive labels! Glue residue will be left on the cutter blade and impair its functioning.

• The cutter has a blade life of 400,000 cuts when using paper liner which is 250μm thick and 3 inches wide.

• You can cut paper with a max. width of 116 mm.

Suggestion • With the cutter installed, set the stop position in QLabel to 28, or the E value to 28.

Before installing the cutter module, remove the cutter cover as shown in the illustration.

Remove the cutter cover

▶ **Preparation Steps**
Please complete the preparation steps before installing the label dispenser.

CONNECT CABLE OF
CUTTER MODULE
UPPER JACK

- The printer must be switched off, or the motherboard may be damaged!
- There are 2 jacks : the lower jack is for the dispenser, the upper jack for the cutter.

Secure the cutter using the screws provided for this purpose.

Pass the labels through the guides.
Close the printing mechanism.

Through the label guides

LABEL GUIDES

Through the cutter module
To finish, press the FEED button to set the label position.

Press the FEED key
Notice

- We advise against using inside wound label stock.

5.3 Cleaning Method

1.Remove the screws and cover.
2.Wipe with a cotton swab or dry lint-free cloth
6 Maintenance And Adjustment

6.1 Cleaning The Print Head

Dirt on the print head or ribbon, or glue residue from the label stock may result in inadequate print quality. The printer cover must therefore always be closed during printing. Keeping dirt and dust away from the paper or labels ensures a good print quality and a longer lifespan of the print head.

▶ **Cleaning Steps**

Here is how you clean the print head.

1. Switch off the printer.
2. Open the printer cover.
3. Release the printing mechanism and lift it.
4. Remove the ribbon.
5. To remove any label residue or other dirt from the print head (see blue arrow), please use a soft lint-free cloth dipped in alcohol.

PRINT HEAD

To Clean the print head
Notice
- The print head should be cleaned once a week.
- Please make sure that there are no metal fragments or other hard particles on the soft cloth used to clean the print head.

6.2 Adjusting The Print Head Pressure

When printing on special media (with varying material thickness), the print quality may suffer. You will then need to adjust the print head pressure.

▶ **Adjustment Steps**

1. Open the printer cover.
2. Remove the ribbon.
3. Use a screw driver and slowly turn the adjustment screws for the print head to increase or reduce the printhead pressure.

Turn the adjustment screws

SCREW (RIGHT)
Screw for adjusting the print head pressure on right side

SCREW (LEFT)
Screw for adjusting the print head pressure on left side
6.3 Adjusting The Print Line

When the print line is incorrectly set, the print quality on one side of the medium may suffer. In such a case, the print line must be adjusted so it is positioned parallel to the paper feed roller.

▶ **Adjustment Methods**

1. To move the print head in direction A as indicated by the blue arrow, turn the adjustment wheel anticlockwise (see arrow 2).
2. To move the print head in direction B as indicated by the blue arrow, turn the adjustment wheel clockwise (see arrow 1).

Direction-A

Direction-B

1

2

Turn the adjustment wheel

ADJUSTMENT WHEEL

PRINT HEAD
6.4 Adjusting The Cutter

While using the cutter, paper jams may occur. Please follow the below steps to clean the paper jam. A socket head screw for adjusting the cutter is located on the bottom of cutter module, as shown in below illustration.

▶ **Cleaning Steps**

1. Switch off the printer.
2. Use a Philips screwdriver to turn the socket head screw and release the knife.
3. When you have cleared the paper jam, switch on the printer again. The cutter will automatically reset.

刀刃位置調整螺絲
Notice • Labels should be at least 30 mm high to ensure correct functioning of the cutter.

6.5 Troubleshooting

Problem	Solution
The printer is switched on but the display does not light up.	◆ Check the power supply.
One or both LEDs light up red and printing is interrupted.	◆ Check the software settings (driver settings) or command codes. ◆ Look for the error alert in the table in **Section 3-3 Error alerts** . ◆ Check whether the cutter is functioning normally and whether it is cutting at all. (Only if a cutter is installed.)
The label stock passes through the printer but no image is printed.	◆ Please make sure that the label stock is loaded the right way up and that it is suitable material. ◆ Please make sure that the ribbon is loaded correctly.
The label stock jams during printing.	◆ Clear the paper jam. Remove any label material left on the thermal print head and clean the print head using a soft lint-free cloth dipped in alcohol.
There is no printed image on part of the label or the image is blurred.	◆ Check the thermal print head for dust or other dirt (label material or ribbon residue). ◆ Check for errors in the application software. ◆ Check the ribbon for wrinkles. ◆ Check the power supply. ◆ Run a self test (**Section 3-2**) and check the test print pattern to see whether the print head prints over the entire width of the medium. ◆ Check the quality of the print medium.
The printed image is positioned incorrectly or a label is missed out during printing.	◆ Run the Label size calibration function. **(Section 3-2)** ◆ Check the label height setting. ◆ Check whether there is paper or dust covering the sensor. ◆ Check the paper guide settings.
The cutter does not cut off the labels in a straight line.	◆ Check whether the label stock is positioned straight.
The cutter does not cut off the labels completely.	◆ Check whether the label is more than 0.2 mm thick.
When using the cutter, the labels are not fed through or cut off incorrectly.	◆ Check whether the cutter has been correctly installed. ◆ Check whether the paper guides are functioning correctly.
The label dispenser is not functioning normally.	◆ Check whether there is dust on the label dispenser. ◆ Check whether the label stock is positioned correctly.

Notice • If any problems occur that are not described here, please contact your dealer.

APPENDIX

Product Specifications

Model	G500-U	G500-US	G500 G500-UES	G530 G530-UES
Print Method	Thermal Transfer / Direct Thermal			
Resolution	203 dpi (8 dots/mm)			300 dpi (12 dots/mm)
Print Speed	5 IPS (127 mm/s)			4 IPS (102 mm/s)

Barcodes — 1-D Bar codes	China Postal Code, Codabar, Code 11, Code 32,Code 39, Code 93, Code 128 (subset A, B, C), EAN-8/EAN-13 (with 2 & 5 digits extension), EAN 128, FIM, German Post Code, GS1 DataBar, HIBC, Industrial 2 of 5 , Interleaved 2-of-5 (I 2 of 5), Interleaved 2-of-5 with Shipping Bearer Bars, ISBT-128, ITF 14, Japanese Postnet, Logmars, MSI, Postnet, Plessey, Planet 11 & 13 digit, RPS 128, Standard 2 of 5, Telepen, Matrix 2 of 5, UPC-A/UPC-E (with 2 or 5 digit extension), UCC/EAN-128 K-Mart, Random Weight and Pharmacode			
Barcodes — 2-D Bar codes	Aztec code, Code 49,Codablock F , Datamatrix code, MaxiCode, Micro PDF417, Micro QR code, PDF417,QR code, TLC 39, GS1 Composite, Dot Code, Marco PDF417			
Code Pages	CODEPAGE 437, 850, 851, 852, 855, 857, 860, 861, 862, 863, 865, 866, 869, 737 WINDOWS 1250, 1251, 1252, 1253, 1254, 1255, 1257 Unicode UTF8、UTF16BE、UTF16LE			
Graphics	Resident graphic file types are BMP and PCX, other graphic formats are downloadable from the software			
Interfaces	USB Device	USB Device Serial port	USB Device Serial Port Ethernet	USB Device Serial Port Ethernet
Control Panel	Two bi-color status-LEDs: Ready, Status Control key: FEED			
Power	Auto Switching 100-240VAC, 50-60Hz			
Environment — Operation temperature	41°F to 104°F (5°C to 40°C)			
Environment — Storage temperature	-4°F to 122°F (-20°C to 50°C)			
Humidity — Operation	30-85%, non-condensing.			
Humidity — Storage	10-90%, non-condensing.			
Agency Approvals	CE(EMC), FCC Class A, CB, CCC, UL, ICES003, BSMI, UKCA, Energy Star (The safety certification marks may be different depending on sales regions.)			
Dimension — Length	11.2" (285 mm)			
Dimension — Width	8.9" (226 mm)			
Dimension — Height	6.8" (171 mm)			
Weight	6 lbs (2.72Kg), excluding consumables			
Options	Cutter module Label Dispenser External label roll holder for 10" (250 mm) O.D. label rolls External label rewinder			

Model	G525			G535		
Print Method	Thermal Transfer / Direct Thermal					
Resolution	203 dpi (8 dots/mm)			300 dpi (12 dots/mm)		
Print Speed	5 IPS (127 mm/s)			4 IPS (102 mm/s)		
Print Width	4.25" (108 mm)			4.16" (105.7 mm)		
Print Length	Min. 0.16" (4 mm)** ; Max. 78.74" (2000 mm)			Min. 0.16" (4 mm)**; Max. 78.74" (2000 mm)		
Processor	32 Bit RISC CPU					
Memory	8MB Flash (4MB for user storage); 16MB SDRAM					
Sensor Type	Adjustable reflective sensor. Fixed transmissive sensor, central aligned					
Media	Types: Continuous form, gap labels, black mark sensing, and punched hole; label length set by auto sensing or programming Width: 1" (25.4 mm) Min. - 4.64" (118 mm) Max. Thickness: 0.003" (0.06 mm) Min. - 0.01" (0.25 mm) Max. Label roll diameter: Max. 5" (127 mm) Core diameter: 1", 1.5" (25.4 mm, 38.1 mm)					
Ribbon	Types: Wax, wax/resin, resin Length: 360' (110 m) Width: 1.18" Min. - 4.33" (30 mm - 110 mm) Max. Ribbon roll diameter: 1.57" (40 mm) Core diameter: 0.5" (12.7 mm)					
Printer Language	EZPL, GEPL, GZPL, GDPL auto switch					
Software	Label design software: GoLabel (for EZPL only) Driver: Vista, Windows 7, Windows 8 & 8.1, Windows 10, Windows Server 2008 R2, 2012, 2012 R2, 2016, 2019, MAC, Linux SDK: Win CE, .NET, Windows Vista, Windows 7, Windows 8 & 8.1, Windows 10, Android, Mac, iOS					
Resident Fonts	Bitmap fonts: 6, 8, 10, 12, 14, 18, 24, 30, 16X26 and OCR A & B Bitmap fonts 90°, 180°, 270° rotatable, single characters 90°, 180°, 270° rotatable Bitmap fonts 8 times expandable in horizontal and vertical directions Scalable fonts 90°, 180°, 270° rotatable					
Download Fonts	Bitmap fonts 90°, 180°, 270° rotatable, single characters 90°, 180°, 270° rotatable Asian fonts 90°, 180°, 270° rotatable and 8 times expandable in horizontal and vertical directions Scalable fonts 90°, 180°, 270° rotatable					
Barcodes	1-D Bar codes: China Postal Code, Codabar, Code 11, Code 32,Code 39, Code 93, Code 128 (subset A, B, C), EAN-8/EAN-13 (with 2 & 5 digits extension), EAN 128, FIM, German Post Code, GS1 DataBar, HIBC, Industrial 2 of 5 , Interleaved 2-of-5 (I 2 of 5), Interleaved 2-of-5 with Shipping Bearer Bars, ISBT-128, ITF 14, Japanese Postnet, Logmars, MSI, Postnet, Plessey, Planet 11 & 13 digit, RPS 128, Standard 2 of 5, Telepen, Matrix 2 of 5, UPC-A/UPC-E (with 2 or 5 digit extension), UCC/EAN-128 K-Mart and Random Weight					
	2-D Bar codes: Aztec code, Code 49,Codablock F , Datamatrix code, MaxiCode, Micro PDF417, Micro QR code, PDF417,QR code, TLC 39, GS1 Composite					
Code Pages	CODEPAGE 437, 850, 851, 852, 855, 857, 860, 861, 862, 863, 865, 866, 869, 737 WINDOWS 1250, 1251, 1252, 1253, 1254, 1255, 1257 Unicode (UTF8, UTF16)					
Graphics	Resident graphic file types are BMP and PCX, other graphic formats are downloadable from the software					
Interfaces	USB Device Parallel Port	USB Device Serial Port Ethernet	USB Device Serial Port Ethernet Parallel Port	USB Device Parallel Port	USB Device Serial Port Ethernet	USB Device Serial Port Ethernet Parallel Port

* Specifications are subject to change without notice. All company and/or product names are trademarks and/or registered trademarks of their respective owners.

* Minimum print height and maximum print speed specification compliance can be dependent on non-standard material variables such as label type, thickness, spacing, liner construction, etc. Godex is pleased to test non-standard materials for minimum print height and maximum print speed capability.

* The cutter is an optional accessory. If the cutter is installed, it is not suitable for children to approach.

APPENDIX
Interface

Pinout description

・ **Parallel Port**

Handshaking: DSTB is sent to the printer, BUSY to the host computer.

Interface Cable: Parallel cable compatible with IBM computers.

Pinout: See below.

Pin NO.	Function	Transmitter
1	/Strobe	host/printer
2-9	Data 0-7	Host
10	/Acknowledge	printer
11	Busy	printer
12	/Paper empty	printer
13	/Select	printer
14	/Auto-Linefeed	host/printer
15	N/C	
16	Signal Gnd	
17	Chasis Gnd	
18	+5V,max 500mA	
19-30	Signal Gnd	host
31	/Initialize	host/printer
32	/Error	printer
33-35	N/C	
36	/Select-in	host/printer

・ **Serial Port**

Default Settings：Baud rate 9600, no parity, 8 data bits, 1 stop bit, XON/XOFF protocol and RTS/CTS

RS232 Housing(9-pin to 9-pin)			
DB9 Socket			DB9 Plug
---			+5V, max 500mA
RXD	1_____	1	TXD
TXD	2_____	2	RXD
DTR	3_____	3	N/C
GND	4_____	4	GND
DSR	5_____	5	RTS
RTS	6_____	6	CTS
CTS	7_____	7	RTS
RI	8_____	8	N/C
PC	9_____	9	Printer

・ **USB**

Connector Type：Type B			
Pin NO.	1	2	3	4
Function	VBUS	D-	D+	GND
